EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Dennis Cawley on June 1, 2006.

The application has been amended as follows:

- a. In **claim 1**, line 11, following the word signal; please insert the words "based upon the determination of the first and second elements".
- b. In **claim 16**, line 13, following the word signal; please insert the words "based upon the determination of the first and second elements".

Allowable Subject Matter

2. **Claims 1-22** are allowed. The following is an examiner's statement of reasons for allowance: The prior art of record fails to sufficiently describe or suggest a device for detecting an ambient condition comprising an airflow monitor with a first element exposed to the airflow and a second element shielded from the airflow and exposed to an ambient environment. The airflow monitor is configured to provide an airflow signal based upon the determination of the first and second elements. These along with further limitations set forth by the claims render the application allowable over the prior art of record.

Art Unit: 2612

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
